SUPPLEMENT TO
REPORT NO.

2511

25X1X

1. The Società Montecatini is reportedly not attempting to create potential for the exploitation of nuclear energy. Of the numerous Montecatini plants, the one which offers the minimum of power needed is located in the lakes of Resia district in the Alps Adige.
2. Work on the hydroelectric power station at the three waterfalls of Curon, Gherenzana and Legnido is still pending because they will not be able to function in conjunction with the other plants. Further they will not be able to furnish the 500,000 Kw-hr needed to run a cyclotron.
3. At present the technical staff of the Institute, under the direction of Prof. Manfredini is primarily concerned with the exploitation of bauxite and the production of vanthates.

This document is hereby regraded to
